

AQUABOY® Pro II

By developing and manufacturing Atmospheric Water Generators, we can produce water from air to those in need without tapping into any of Earth's scarce, groundwater resources. In environments with little to no access to clean, safe drinking water, our Atmospheric Water Generators can be used to add relief during short or long-term situations.

Quality

- Eliminates contaminants
- Complies with EPA regulatory limits

Sustainability

- Supplies unlimited purified water
- Uses no groundwater

Availability

- Provides water where no water exists
- Eliminates transportation of water

Value

- The average cost is as low as \$0.09* per gallon
- The average cost of bottled water is \$1.60 per gallon (in the USA)

Pollution

- Eliminates plastic bottles and containers
- Has saved over 200 million plastic bottles

*Based on 95°F, 90% RH and \$0.10 per kWh

The ideal solution for:

- Guest suite
- Fitness area
- Spa area

- Vend area
- Dining area
- Outside of conference room

- Lobby
- Food service area
- Break room

Outside of conference room

Guest suite

Fitness area

Featuring:

CondensationTech™

Our proprietary system for making AquaBoy® "purified great tasting water"™ from the air using modern science to take dehumidification into a whole new category.

The AquaBoy® Pro II condenses water from the air and processes it through a 7-stage filtration system generating up to 2 to 5 gallons of "purified great tasting water"™ per day with no harmful ingredients.

The appliance dispenses hot and cold purified drinking water with just the touch of a button, making it perfect for hot tea, gourmet coffee, ice, cooking, pet care and so much more.

There's no installation, just plug it in and follow the Quick Start instructions. 2-year limited warranty.

Benefits and features

Benefits

- Self-sustaining water dispenser
- Make your own "purified great tasting water"™ from the air
- No harmful ingredients
- No plumbing needed*
- Use no groundwater
- Eliminate plastic bottles
- Save money
- Contemporary, compact design

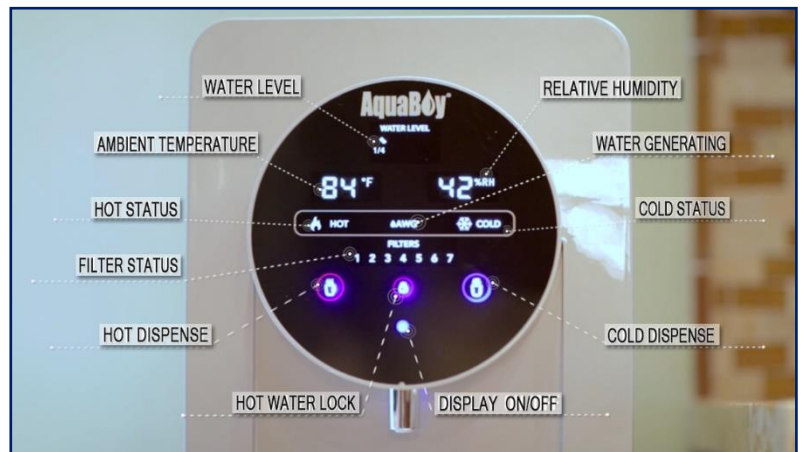

*To ensure an endless supply of pure great tasting water is available under conditions of heavy use, or periods of low humidity, the AquaBoy® Pro II has an inlet that permits additional water sources to be used to supplement the water being made from the air.

Features

- UL Listed
- Hot (180°) and cold (44°) water
- Hot water lock
- Stainless steel tanks and coils
- Stores 4.6 gallons of water
- 7-stage EZ-Filter™ process (including HEPA & UV)
- Energy saving sensors
- Microcomputer
- Advanced SmartScreen™ LED control panel
- AirMax™ fan
- Water level gauge
- Filter replacement indicators

Advanced SmartScreen™ LED control panel
